### **Feeding:** *Delightful and helpful items from bottles to bibs to bites*

- ❑ **Green to Grow Bottles and Nipples** — Bottles made from PES plastic, which gives them a natural golden color. They are free of phthalates and free of bisphenol A (BPA)— a suspected hormone-disrupting chemical used in polycarbonate plastic, from which most baby bottles are made. Bottles are tested in the U.S. to ensure they meet the highest standards for quality and safety. Free of lead and PVC. Compatible with Medela breast pump. Dishwasher safe (top rack).
- ❑ **Baby Sigg** — Like all SIGG bottles, our SIGG Kids bottles are tested to be 100-percent safe with NO leaching. These SIGG Kids bottles are durable, leak-proof, and suitable for all beverages juices, energy drinks and more. SIGG Kids bottles are non-toxic and dishwasher safe. With so many styles to choose from, staying hydrated has never been so much fun!
- ❑ **Baby Kleen Kanteen** — Every new parent wants to make sure their baby's environment is as healthy as possible. Kleen Kanteen™ can help with that. We designed a special adapter that works with Avent's™ patented sippy cup spout. It's all BPA-free polypropylene and integrates seamlessly with our 12oz Kleen Kanteen™ Classic bottle. The bottle is BPA- and toxin-free, food grade stainless steel. Plus your Kleen Kanteen™ will never leach chemicals, toxins, or funky flavors into your child's water or juice. It's designed for small hands, making it easy to hold. And the large-mouth makes cleaning as simple as a quick scrub with soap and water or a trip through the dishwasher. So you can put your energy into the important stuff like bedtime stories and teaching junior to say “mama” and “dada”. Relax knowing your child is drinking from a completely healthy and hygienic sippy.
- ❑ **Snack Trap** — A cute, two-handled snack cup for toddlers. The lid is made of soft plastic with slits, and is designed to allow chubby baby hands to poke through and grab a treat, but close up behind them. The cup is tip-resistant and prevents spills with the innovative lid. We also offer a tether that allows you to strap the cup to the stroller or car seat for easy snacking and loss prevention.
- ❑ **Baby Human Spoon** — A dual-ended spoon that is ergonomically shaped to reduce frustration for our budding table eaters. This spoon comes in packages of two, and is double-sided, so it can be used in the right or left hand. The arced handle is contoured to fit baby's hand and aligns the spoon with the baby's mouth, allowing for easier self-feeding. The spoon is also designed with a mouth guard to prevent gagging. The spoon is BPA and phthalate free.
- ❑ **Fogo Thermos Sippy Cups** — Spill-proof valve prevents messes and is easy-to-clean. Soft spout is easy and comfortable to sip. Kid-proof design - unbreakable stainless steel interior and exterior withstands daily wear and tear. Dishwasher safe. Exterior stays condensation free. Non-slip, scratch resistant base. Keeps beverages cold for up

to 6 hours - for cold contents only.

- ❑ **Dwink Box** — Designed to fit most individual drink boxes and pouches the Dwink box will also fit soy milk and extra small juice boxes. Now you don't need to hold the drink for your children the entire time they're drinking, or drink half of the drink before it's safe enough for your kids to hold it themselves.
- ❑ **Baby Safe Feeder** — Solid foods are no longer a choking hazard for babies. The Baby Safe Feeder allows the parent to feed their baby fresh foods of their choice. The soft mesh bag is soothing to the baby's gums. Fill with ice or frozen fruits and the Feeder becomes the perfect teether. It also helps with the transition from drinking to chewing while reducing the high risk of choking. It is reusable and dishwasher safe. It contains no PVC, no Polycarbonate and no BPA, and complies with the EU and California phthalates requirements.
- ❑ **Miracle Milk Bib** — The Miracle Milk Bib was designed to keep baby dry specifically during bottle and breast feedings. It takes newborn babies time to learn to suckle, often-making feedings a wet and cold experience. With the Miracle Milk Bib, three precise layers of fabric act to pull liquid away from the surface into the absorbent core. The waterproof lining then prevents this liquid from soaking through to your baby's skin. A soft fleece neck roll stops rashes by preventing fluids from leaking down baby's neck. The Miracle Milk Bib is easy to clean – just machine wash in warm water and tumble dry.
- ❑ **Perfect Pocket Bib** — “The Perfect Pocket Waterproof Bib is a must have for any parent.” The patented mess-catching pocket is not your typical flat, “sewn in place” pocket. In fact, it can be unsnapped and laid flat so that you can quickly wipe it clean and then snap it back up again ready for use. What's more, when fastened our pocket is specially designed to bow away from baby staying open and therefore catching and retaining up to ½ cup of food and liquid! Say good-bye to rusty metal fasteners and sharp Velcro as our bibs come with comfortable and adjustable plastic neck fasteners.
- ❑ **Plush Pocket Blanket** — Your little one will love to snuggle in our very soft, very luxurious Plush Pocket Blanket. This non-shed microfibre plush blanket was cleverly designed with a zipper pocket large enough to hold one of our bibs or burp pads and baby's favorite soother. Our products are designed to grow with your child, and as your little one grows, he or she will enjoy zipping their little treasures into the pocket!
- ❑ **Burp Pad** — The Reversible Baby Burp Pad is notched for placement around the side of mom or dad's neck helping it to stay in place while burping baby. Our two layers of extra soft, super absorbent flannel helps prevent leaks through to your clothing, while giving baby the softest surface possible. As baby grows, use your burp pad to wipe up your infant's and toddler's little messes. Our products grow with your child and are made of the highest quality fabrics.
- ❑ **Baby Cubes** — Hassle-free and convenient way to prepare and store baby food. 2 oz. or 70 mL per cube, comes in a set of 8 individual cubes. The lids attached directly to cubes for convenience and each cube has measurement indicator at 30mL, 45mL, and 70mL. Dishwasher safe, microwave safe, freezer safe.
